When setting up graphs for class, you can usually fit 4 sets of axes on each side of your graph paper.

## Remember:

- Use the lines that are already there to draw your axes.
- Do NOT make your points HUGE. The larger your points, the less accurate your graph will be.
- PLEASE USE A RULER.

|  |  |  |  |  |  |  |  | 1 |  |  |  |  |  |  |  |  |
